Resources

- Photographs
- Non-fiction books
- Videos
- Food – senses
- Tally chart
- Large paper

Sticky Knowledge

Most **humans** have the same body parts: **arms, legs, head, hands, feet, fingers, toes, neck and torso.**

There are some **differences** between humans, for example: **eye colour, hair colour** and **height** and some have missing or adapted body parts.

There are five senses: **sight, smell, taste, touch and hearing.**

Sight – eyes. Smell – nose. Taste – mouth. Touch – hands and hearing – ears. The senses often work together.

Humans have a **lifecycle: baby, child, teenager, adult.** They have **offspring.**

Key Learning

- Identify, name, draw and label the basic parts of the human body and say which part is associated with each sense.
- Notice that animals have offspring that grow into adults.
